

NCRTAC-Out of Hospital Meeting Minutes

01/21/2010

Possible training ideas were discussed for the upcoming summer. There was discussion about possibly holding some type of MCI training whether it be table top version or hands on training. We decided that we may be able to hold more than one exercise in different areas of the region. The group was asked to think about possible ideas and bring them back to the next meeting. There also may be the possibility of monies from the RTAC to fund some of this training.

The out of hospital committee also brought up the possibility of the RTAC sponsoring training other than the Spirit conference. There are several other training opportunities open such as WEMSA, Tomahawk fire school, and the paramedic conference in Appleton.

Jason Keffler also brought up the possibility of offering some of the RTAC monies through grants to first responder groups and EMS services within the region. The thought was that 500.00 grants could be offered for any type of equipment or training related to trauma. The thought process for this is that not every department needs money for training. In many cases some services may need supplies especially the first responder groups that have very limited monies.
